

Marantz RC5000*i* Programmable Universal Remote Control: The World's Most Advanced Remote is Now Even Better.

Now more than ever, the Marantz RC5000*i* Programmable Universal Remote Control is the ultimate remote control for the home theater enthusiast. Incorporating more than a dozen improvements, the sleek, compact RC5000*i* features an innovative LCD touchscreen display with "virtual" buttons that reconfigure and rename themselves according to the audio and video component selected.

Though it has just seven buttons plus its LCD panel, the Marantz RC5000*i* offers total control of everything in a home entertainment system - from video components to audio components and even IR-controlled accessories such as motorized projection screens and lighting.

With double the memory capacity of the previous version, the RC5000*i* can learn the control codes from virtually every brand of IR remote control, using its exclusive Marantz Digital Learning (MDL) system, and display hundreds of control screens. The RC5000*i* also comes pre-programmed to operate a wide variety of Marantz audio and video products, as well as some popular brands of satellite receiver equipment and other components that use Philips RC-5/RC-6 control codes.

The RC5000*i* is more versatile and easier to use than ever. Its animated help files make setup and programming a breeze. Programmable Instant Surf buttons call up any channel at the touch of a single button, and one-touch access to all the controls of any component is available via Marantz's unique tab-style navigation. The RC5000*i* will even keep track of the last six control screens used.

You can also personalize the programming and appearance of your RC5000*i* using Windows® PC programming software, and import your own custom animations, photos, graphics and channel icons.

The RC5000*i* is a triumph of ergonomic design, with contours that fit comfortably into the hand. The large touchscreen LCD panel is self-illuminating, enabling easy operation even in darkened rooms. In addition to the touchscreen panel, the RC5000*i*'s seven buttons (five back-lit) provide instant access to the most used functions such as volume adjust and channel selection, as well as instant navigation between screens. Personalize the simple setup from the comfort of your couch, or use the PC interface with downloadable software.

The Marantz RC5000*i* even eliminates the need for battery replacement. In addition to operating on AA batteries, the RC5000*i* contains a rechargeable battery and fits into a docking/recharging unit. Just store the RC5000*i* in the docking station when not in use to keep it fully operational at all times. Even if your batteries die, the memory won't - it's non-volatile.

The RC5000*i* contains an extensive complement of additional advanced features, including macro keys that can be programmed to transmit hundreds of commands at a single touch. The Marantz RC5000*i* is the indispensable component no home theater enthusiast should be without!

Features

- Large high-resolution (320 x 240) touchscreen display with contrast control
- Seven programmable direct access buttons
- Editable macros
- Animated help files
- Backlighting for LCD and direct access buttons
- Pre-programmed to operate Marantz audio and video components and other components that use the Philips RC-5/RC-6 remote control language
- Extra large 2 MB non-volatile flash memory

Included Accessories

- NiMH 4.8V rechargeable battery pack
- Docking Station/Recharger
- 110/220V to 12V power adapter
- RS232 cable for PC connection
